

Consulting Proposal from Industry Leaders

Have you heard about Bitcoin and the Blockchain but don't know what it is? You might be interested, scared, or curious? Bloc10 is a Fin Tech Blockchain company that can answer these questions for you. We are based in Atlanta, Georgia and operate representative offices globally. We have vast technical experience handling customers of all shapes and sizes, including some of America's leading corporate names.

Bloc10 can consult with your organization to determine how Blockchain technologies, including but not limited to Bitcoin, may help your organization. First we will engage you through a process of due diligence, Q&A to determine the scope of your I.T. operations. Then we will create a comprehensive report detailing specific steps you can take to integrate Blockchain into your current operations.

Blockchain has a wide appeal and nearly endless use-cases, it is not just a financial technology. Let's take a look at some interesting use-cases in the news:

Arizona Lawmakers Want to Let People Pay Taxes in Bitcoin¹

A new bill submitted to the Arizona Senate would, if approved, allow people to pay their state tax liabilities using bitcoin or other cryptocurrencies. [Public records](#) show that the bill – sponsored by state Senator Warren Petersen and co-sponsored by three other lawmakers – was submitted for consideration on Jan. 9. It has since been referred to the Arizona Senate Rules Committee for further deliberation. According to the text, the measure would allow for the use of "a payment gateway, such as bitcoin or other cryptocurrency, using Peer-to-Peer systems" in order to pay "tax and any interest and penalties" owed to the state government.

Shipping Blockchain: Maersk Spin-Off Aims to Commercialize Trade Platform²

Global shipping giant Maersk wants to wrap the world in a blockchain. With access to a shared, trusted record of transactions, Maersk executives say, the world's shipping companies would save money and be able to better compete on enhanced services. And the company has developed its

technology using the Fabric software contributed by IBM to the open-source Linux Foundation, to do just that.

IBM is partnering with food suppliers including Dole, Nestlé, and Walmart to better regulate food safety using blockchain.³

On Tuesday, IBM announced a major blockchain collaboration with a number of leading food suppliers to better track contaminated food and prevent it from reaching consumers. IBM will work with Dole, Golden State Foods, Kroger, McCormick and Company, Nestlé, Tyson Foods, Unilever, and Walmart on this effort, according to a press release.

Bloc10's minimum engagement is 100 hours @ \$50/hr. or \$5,000 USD for Blockchain consulting services.

About Bloc10

Bloc10 Tech is a Blockchain Fin Tech startup founded by a Consortium of companies from Wall St. and the tech sector. The goal of Bloc10 is to develop the next generation Blockchain applications for the Financial Services industry. Bloc10 is Blockchain Fin Tech building the new paradigm in Blockchain technology one bloc at a time; until we reach the 10th dimension. In quantum Physics, the 10th dimension represents infinite possibilities. It seems that is what the Bit Paradigm has opened up for us - infinite possibilities. Of course we need to be practical and build applications with strong use-cases, that are addictive, or that solve a major economic problem, as Bitcoin did. Bloc10 opens up the infinite – Bloc10 – Building infinite possibilities, bloc by bloc.

Who is behind Bloc10

Bloc10's founding individuals and corporations have more than 100+ years combined experience in the financial and technology sectors.
